

AKS 32 FP

User-friendly development

Being able to develop one's growth means firstly developing one's autonomy. With the automatic film processor AKS 32 FP you benefit from great ease-of-use and maintenance with reliability.

> Simplicity

- Processing of all your films 135, APS, 110, 120, 220 and 126
- Automatism to ensure the photofinisher's optimum efficiency
- Ease of maintenance thanks to its user-friendly keyboard that enables the photofinisher to enter all the parameters necessary for its smooth functioning

> Productivity

- 32 films per hour
- Simultaneous development of two similar or different film types (except APS)
- Excellent processing stability ever since a production of 20 films/day

> Safety

- Safety lock to avoid any accidental opening while the machine is operating
- After processing, vertical storage of the films ready to be printed, without any extra handling

Technical features

Type: Automatic film processor

Film advance: By 2-track film leader

Speed: 392,5 mm/minute

Processing time: 9'31"

Productivity: 32 films per hour

(24 exposure 135 film or 25 exposure APS film)

Tank capacity:

- Developer: 13,5 l
- Bleach: 4,4 l
- Fixing baths: 4,2 l - 4,6 l
- Stabilisers: 3,2 l - 3,4 l - 3,8 l
- Maintenance: 10 l
- Waste: 2 x 7 l - Recovery of waste chemicals containing silver salts

Chemical: C41-RA

Film types: 135, 126, APS, 110, 120, 220

Dimensions: D: 1345 mm, L: 580 mm, H: 1060 mm

Weight: 250 kg with chemical

Power supply: Single-phase alternating current 200V-240V, 3,7 kW

Strong point:

- Baths temperature auto-regulated
- Automatic replenishment haunts to a system of independent pumps
- Automatic filtration and circulation of all baths with AEC
- Automatic end film cut
- Regulated drying temperature
- Timer with calendar
- Stand-by mode drying temperature when no film is being processed
